

Olivia (Zerun) Xiao

Mountain View, CA | 778-317-9661 | olivia.xiao@gmail.com | linkedin.com/in/olivia-zerun-xiao/ | github.com/liviee

Summary

AI developer-ecosystem and GTM builder in the Bay Area — runs the hackathon, workshop, and builder-sprint motion end to end, and holds relationships across developer communities, accelerators, and frontier model labs. Ships production AI systems hands-on with agentic coding; fluent in multi-agent architectures, eval harness design, and MCP.

Education

Carnegie Mellon University

Master of Software Management (MBA-equivalent, Product Management) | GPA 4.0/4.0

Aug 2024 - Dec 2025

Mountain View, CA

- **Bosch Collaboration, Product Lead** (Sep 2025 - Dec 2025): Designed a GenAI analytics suite unifying a SQL agent, analysis, and visualization into one workflow, automating 80%+ of manual analytics tasks.
- **Bosch Collaboration, Solution Architect** (Feb 2025 - Apr 2025): Built a modular multi-agent pipeline on LangGraph and OpenAI with a paired quantitative and qualitative evaluation harness, lifting document preprocessing accuracy from 57% to 100%.
- **Achievements:** IEEE Rising Stars 2026 1st Place x2 (stage pitch and project showcase); CMU Product Hackathon 2nd Prize x2; PM Course Advisor.

Western University

Master of Data Analytics (MDA), Generalist Field Specialty | GPA 3.7/4.0

Sep 2019 - Oct 2020

London, Canada

University of British Columbia

Bachelor of Science, Computer Science | Dean's Honour List (2015 - 2016)

Sep 2014 - May 2019

Vancouver, Canada

Work Experience

Technical Product Market Analyst

Yuto USA Corporation | Advanced Materials Innovation

Apr 2026 - Present

Santa Clara, CA

- Shipped a 0-to-1 AI product to production — automated ingestion pipeline, forecasting service, and web console — running a walk-forward eval across 13 model families for model selection, cutting one-month error 9.2% → 7.5% at 90% directional accuracy, with full formula-level traceability and human-in-the-loop override to drive adoption; built solo with agentic coding, now in daily use by the executive team.
- Drive technical program management for a top-tier consumer technology account and a category-leading consumer brand across 5+ concurrent workstreams — kickoffs, requirements intake, and cross-functional alignment between customer stakeholders and engineering, plus partner NDA and collaboration terms.
- Own market, competitive, and supply-chain research feeding roadmap and GTM decisions, and delivered the company showcase at a top-tier global technology client's on-campus tech day — 20+ layout iterations and 8 supplier decks audited against feedback, drawing 100+ attendees including procurement leads from several of the client's business units.

Program Manager Intern, AI Platform & Program Support

AI Valley | AI Ecosystem & Developer Community

Feb 2026 - Apr 2026

Mountain View, CA

- Coordinated the developer program calendar for a Bay Area AI community — workshops, hackathons, Builder Sprints, Demo Days, meetups — drafting program goals, timelines, run-of-show, and success metrics, emceeing or moderating panels on the day, and tracking each from prep through retrospective; events averaged 200+ founders, developers, and investors.
- Ran developer relations for a one-week global build challenge co-hosted with a leading open-weights model lab — developer recruiting, incentive design, the GitHub/X submission funnel, judging, and post-event amplification; close to 100 projects shipped, with standouts featured on the lab's official channels.
- Wrote the outbound developer content across LinkedIn, X, and Discord — launch posts, partnership announcements, contest rules, recaps — and worked developer, accelerator, and frontier-lab relationships, sourcing speakers via CMU and Bay Area university networks and supporting GTC Week Palo Alto programming with a frontier multimodal model lab.
- Synthesized ecosystem signal into structured reads on model adoption barriers and developer distribution, feeding program design and partner targeting.

Product Intern

Theta Health | AI Healthcare

May 2025 - Aug 2025

Woodside, CA

- Launched a 0-to-1 clinician-facing AI Scribe MVP on HIPAA-compliant infrastructure, grounded in 5+ physician interviews and 10+ competitive analyses translated into feature scope and prompt design — cut manual documentation time 83%.
- Diagnosed the integration barriers blocking adoption of an open-source Healthcare MCP server and validated clinical demand for the AI Scribe, reshaping roadmap priorities and landing the first clinic pilot.

Product Manager

Xpertbay | Professional Talent Marketplace

Sep 2023 - Jul 2024

Remote, Canada

- Redesigned activation workflows, optimized search filters, and synthesized user testing into 12 prioritized improvements — raising onboarding completion 10%, successful marketplace matches 15%, and NPS 8 points.

Technical Product Analyst

People.ai | YC-Incubated Sales Analytics SaaS

Apr 2021 - Sep 2023

Toronto, Canada

- Diagnosed data-quality defects degrading product reliability and partnered with Engineering on targeted fixes, reducing customer churn 6% and earning a company award for customer-first ownership.
- Analyzed usage patterns to influence roadmap priorities and built a Tableau dashboard covering 50+ enterprise clients, growing feature adoption 13% and validating ROI to support renewals.

Skills

AI & Technical: LLMs & Agents, Multi-Agent Orchestration (LangGraph), MCP, Prompt Engineering & Fine-Tuning, Eval Harness Design, Agentic Coding (Claude Code, Cursor), Python, SQL, PySpark, Streamlit, Databricks, AWS / GCP / Azure

DevRel & GTM: Developer Relations, Hackathon / Builder Sprint / Workshop Programming, Ecosystem & Partner Development, Developer Content (LinkedIn / X / Discord), GTM Strategy, Speaker Sourcing, Event Hosting & Panel Moderation, Public Speaking

Product: Product Discovery, Roadmap Planning, Prioritization (RICE), Competitive Analysis, Metric Definition, Funnel Analysis, A/B Testing, KPI Tracking, Stakeholder Management, Agile, Figma, Notion, Airtable

Languages: English (fluent — educated and working in North America since 2014), Mandarin Chinese (native)
